

# Toolkit Portfolio Ideas

T03 Group 5  
26SEP2022

# #1: Ethical Dimensions Activity

1. Given the project, the facilitator asks workshop members to collectively draw out what the MVP could look like on a big poster containing sections (20-30 mins)
2. Each person gets a different ethical principle topic at random and anonymously. Their goal is to write down how the MVP addresses that principle (5-10 mins)
3. Then, the paper is folded up and submitted to a box. Each person will take turns to select a new piece of paper (that isn't theirs) from the box and write down how the MVP will fail to address that principle. (10-15 mins)
4. Repeat Step 3 but this time, the person addresses how the MVP can fix those issues. (10-15 mins)
5. Finally, submit all the papers to the box and the facilitator will pull out all the principles, lay them out, and read them out. Then, the team is required to incorporate the findings from the papers to update their MVP idea.

# Minimal Viable Product Definition

## Define the Minimal Viable Product (MVP)

### Project Title

#### Description:

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. # #2: Responsible Innovation Questionnaire

1. Given a project, team members will be required to fill in a questionnaire that scores the project based on the responsible innovation categories:

- Diversity & Inclusion
- Anticipation and reflection
- Responsiveness and adaptive change
- Openness and transparency
- Environmental Sustainability
- Social Sustainability

In addition, a comment space will be left in the end of questionnaire, where members can specifically describe their perspectives about the project.

2. Summarise results of questionnaire by taking average scores for each category

3. Start a group discussion on categories with scores less than 80, if no instruction under 80, discuss the one with the lowest average score.

4. Further develop project based on discussion results.
